

1. Accurate evaluation of the Kochin function for added resistance using a high-order finite difference-based seakeeping code [Mostafa Amini-Afshar and Harry B. Bingham, Technical University of Denmark](#)
2. Nonlocal Model for Deep Water Waves of a Potential Flow [Michael Bestehorn, Peder A. Tyvand, Germany, Norway](#)
3. Head-on collision between two hydroelastic solitary waves under a thin ice sheet floating on shallow water [M. M. Bhatti and D. Q. Lu, Shanghai University](#)
4. Hydrodynamics of Side Wall Effects through Image Green Function based TEBEM [Jikang Chen, Wenyang Duan and Binbin Zhao, Harbin Engineering University](#)
5. A primary analysis of water wavefronts [Xiaobo Chen, Ruipeng Li and Binbin Zhao, Bureau Veritas, Harbin](#)
6. Numerical study of the hydrodynamic performance of a pile-restrained WEC-type floating breakwater [Qiang Chen, Jun Zang, Xuanlie Zhao, Dezhi Ning, University of Bath, Dalian University of Technology](#)
7. Preliminary study on coupling of viscous and potential flow using domain decomposition and relaxation zones [Choi Y.M., Malenica S., Bouscasse B., Sopheak S., Monroy C., Gentaz L., and Ferrant, Bureau Veritas, Ecole Centrale de Nantes](#)
8. Robust computation of steady water waves of arbitrary length [Didier CLAMOND, Universite Cote d'Azur](#)
9. Flexural gravity wave blocking in a two-layer fluid [Santu Das, Trilochan Sahoo and Michael H. Meylan, India](#)
10. Experimental and numerical investigation of sloshing in anti-roll tank using effective gravity angle. [J. Ercolanelli, M. Le Boulluec, Y-M. Scolan, A. Babarit, P. Magaldi, Ifremer](#)
11. Extraordinary transmission past cylinders in channels [D.V. Evans, R. Porter, J.R. Chaplin, University of Bristol, University of Southampton](#)
12. Efficient Methodology of Roll Load Prediction on 2D bodies in Nonlinear Flows [Ratnakar Gadi and R.H.M Huijmans, Delft University](#)
13. Wave energy park interactions in short-crested waves [Malin Goteman, Marianna Giassi, Cameron McNatt, Uppsala University](#)
14. Simulation of a fixed cylinder in waves using the SWENSE method within a weakly-compressible approach [M. Gouin, G. Oger and D. Le Touze, Ecole Centrale Nantes](#)
15. Analysis of the generation phase of the upstream waves caused by a ship moving across a depth change [John Grue, University of Oslo](#)
16. Hybrid modeling of wave structure interaction with overlapping viscous-inviscid domains [Jeffrey C. Harris, Christopher M. O'Reilly, Amin Mivehchi, Konstantin Kuznetsov, Christian F. Janssen, Stephan T. Grilli, Jason M. Dahl, LHSV, Ecole des Ponts, CEREMA, EDF R&D, Universit Paris-Est](#)
17. Wave Diffraction by Multiple Vertical Cylinders: The Nonlinear Shallow Water Wave Equations [Masoud Hayatdavoodi, Douglas R. Neill and R. Cengiz Ertekin, UK, USA, China](#)
18. The waterline integral in the Neumann-Kelvin theory of ship waves [Jiayi He, Francis Noblesse, Chen-Jun Yang, Wei Li, Gerard Delhommeau, Shanghai Jiao Tong University, Ecole Centrale de Nantes](#)

19. On Natural Modes in Two-dimensional Asymmetric and Symmetric Moonpools in Finite Water Depth [Haiyang Huang, Xinshu Zhang, Shanghai Jiao Tong University](#)
20. Effect of the body curvature on aircraft ditching hydrodynamics [A. Iafrati, CNR-INSEAN](#)
21. Backward Waves through Array of Rectangular Columns [Takahito Iida and Masashi Kashiwagi, Osaka University](#)
22. An Innovative EFD for Studying Ship Seakeeping [Hidetsugu Iwashita and Masashi Kashiwagi, Hiroshima University, Osaka University](#)
23. Water impact near the edge of a floating ice sheet [T.I. Khabakhpasheva, Yang Chen, A.A. Korobkin, K. Maki, University of East Anglia, University of Michigan](#)
24. Dispersive shock water waves. Experiments and numerical comparisons [O. Kimmoun, H.C. Hsu, A. Chabchoub, France, Taiwan, Australia](#)
25. Interaction of hydroelastic waves in ice cover with vertical walls [A.A. Korobkin, S. Malenica, T. Khabakhpasheva, University of East Anglia](#)
26. Formation of waves riding on the forced free-surface flow [Vasily K. Kostikov, Nikolay I. Makarenko, Lavrentyev Institute of Hydrodynamics](#)
27. Prediction of Ship Operation Performance in Waves by Seakeeping- Maneuvering Coupled Analysis [Jae-Hoon Lee, Yonghwan Kim, Seoul National University](#)
28. Wave-making problem by a vertical cylinder: Neumann-Kelvin theory versus Neumann-Michell theory [Hui Liang, Xiaobo Chen, Xingya Feng, Bureau Veritas](#)
29. Challenges in developing a SWENSE two-phase CFD solver for complex wave conditions [Zhaobin Li, Benjamin Bouscasse, Guillaume Ducrozet, Lionel Gentaz, and Pierre Ferrant, Ecole Centrale de Nantes, Ecole Centrale de Nantes](#)
30. Transient wave run-up on cylinders due to wavefronts [Ruipeng Li and Wenyang Duan, Harbin Engineering University](#)
31. Numerical Simulation of Breaking Waves Using Adaptive Mesh Approach [Cheng Liu, Changhong Hu, Kyushu University](#)
32. Numerical simulation of wave propagation over submerged reef [Jinxuan Li, Jun Zang, Shuxue Liu, Wei Jia, Qiang Chen, Dalian University of Technology, University of Bath](#)
33. Linearized seakeeping using CFD [Malenica S., & Vukcevic V., University of Zagreb](#)
34. Application of the Hydroelastic Theory of Ships to the Motion of Ice Shelves [M. H. Meylan, L. G. Bennetts, M. Ilyas, B. Lamichhane and M. A. Peter, University of Newcastle, Australia](#)
35. A second-order theory for wave energy converters with curved geometry [Simone Michele, Emiliano Renzi, and Paolo Sammarco, Loughborough University, University of Rome](#)
36. On sloshing modes in square or nearly square moonpools [Bernard Molin, Aix Marseille Univ, CNRS, Centrale Marseille, IRPHE](#)
37. Hydrodynamic investigation of a dual-chamber OWC Wave Energy Converter [De-Zhi Ning, Rong-Quan Wang, Ying Gou, Dalian](#)

38. Boundary-integral relations in the theory of ship motions in regular waves [Francis Noblesse](#), [Shanghai Jiao Tong University](#)
39. Semi-analytical solution for wave diffraction-radiation by a truncated porous vertical cylinder [Ouled Housseine C.](#) & [Malenica S.](#), [Bureau Veritas](#)
40. Rainbow trapping of water waves [M. A. Peter](#), [L. G. Bennetts](#) and [R. V. Craster](#), [University of Augsburg](#), [University of Adelaide](#), [Imperial College London](#)
41. Long-period passing vessel forces on ships moored in a port [Jo Pinkster](#), [PMH bv](#) and [Arne van der Hout](#) , [Deltares](#)
42. Plate arrays as a water wave metamaterial [R. Porter](#), [University of Bristol](#)
43. The behaviour of short waves in the presence of large long waves [R.C.T.Rainey](#), [Rod Rainey & Associates](#), [Bath](#)
44. Time- and Frequency-domain Comparisons of the Wavepiston Wave Energy Converter [Robert Read](#) and [Harry Bingham](#), [Technical University of Denmark](#)
45. Modelling nonlinear wave-body interaction with the Harmonic Polynomial Cell method combined with the Immersed Boundary Method on a fixed grid [Fabien Robaux](#), [Michel Benoit](#), [IRPHE](#)
46. Wave Energy Conversion using Machine Learning Forecasts and Model Predictive Control. [Paul D. Slavounos](#) and [Yu Ma](#), [Massachusetts Institute of Technology](#)
47. Large time behaviour of the ice cover caused by a load moving along a frozen channel [K.A. Shishmarev](#), [T.I. Khabakhpasheva](#) and [A.A. Korobkin](#), [Altai State University](#), [University of East Anglia](#)
48. Validation of damaged ship hydrodynamics by a Domain Decomposition Approach using the Harmonic Polynomial Cell method and OpenFOAM [Mohd Atif Siddiqui](#), [Marilena Greco](#), [Giuseppina Colicchio](#) ,[Odd M. Faltinsen](#), [NTNU AMOS](#), [CNR-INSEAN](#)
49. An experimental setup for wave-body forces in shear currents [Benjamin K. Smeltzer](#), [Eirik AEsøy](#), [Yan Li](#), [Simen AA. Ellingsen](#), [NTNU](#)
50. Numerical simulation of wave impact with air cavity effects [Bingyue Song](#), [Chongwei Zhang](#), [Kunming University of Science and Technology](#), [Dalian University of Technology](#)
51. The Uniform Motion of an External Load along the Edge of the Ice Cover [Izolda V. Sturova](#) and [Larisa A. Tkacheva](#), [Lavrentyev Institute of Hydrodynamics](#)
52. Experiments on the water entry and/or exit of a cone [Alan Tassin](#), [Thibaut Breton](#), [Nicolas Jacques](#), [Ifremer](#)
53. Wave Transmission through Vertical Thin Barriers with Gaps in Channels by a Hyper Singular BEM [B Teng](#), [J Huang](#), [Y F Zhao](#) and [Y Gou](#), [Dalian](#)
54. Experimental study of the fast exit of a plate lifting from a water surface [P. Vega-Martinez](#), [J. Rodriguez-Rodriguez](#), [T.I. Khabakhpasheva](#), [A.A. Korobkin](#), [Universidad Carlos III de Madrid](#), [University of East Anglia](#)
55. Reconstruction of an extreme wave profile with analytical methods [Thomas Vyzikas](#), [Marc Prevosto](#), [Christophe Maisondieu](#), [Alan Tassin](#), and [Deborah Greaves](#), [Plymouth University](#)
56. A harmonic polynomial method based on Cartesian grids with local refinement for complex wave-body interactions [Jingbo Wang](#), [Odd M. Faltinsen](#), [AMOS](#), [NTNU](#)

57. A Combined CFD/Potential Flow Simulation Method for Prediction of Hydrodynamic Maneuvering Forces [Paul F. White](#), [Robert F. Beck](#), [Kevin J. Maki](#), and [Dominic J. Piro](#), University of Michigan
58. Study on Asymptotic Formula for Added Resistance in Short Waves [Kyung-Kyu Yang](#), [Yonghwan Kim](#) and [Yoo-Won Jung](#), Seoul National University
59. Unsteady waves generated by two ships with different speeds [Zhi-Ming Yuan](#), [Ronald W. Yeung](#), University of Strathclyde, University of California
60. The role of overtopping duration in greenwater loading [Xiantao Zhang](#), [Hugh Wolgamot](#), [Scott Draper](#), [Wenhua Zhao](#) and [Liang Cheng](#), University of Western Australia
61. Amplification of wave run-up in random waves driven by tertiary interactions [W. Zhao](#), [P. H. Taylor](#), [H.A. Wolgamot](#), [R. Eatock Taylor](#), University of Western Australia,
62. Steady solution of internal solitary waves in linear shear current [B.B. Zhao](#), [Z. Wang](#), [W.Y. Duan](#), [W.Q. Yang](#), [R.C. Ertekin](#), Harbin Engineering University
